

Print-ready File submission

NVS proffered file formats are: Ai or PDF.
 PDF files should be saved in a vector format.

Accepted file formats are: AI, PDF, PSD, TIFF, JPGs & EPS

Ai / PDF Checklist

- Embed high-res images. Recommended image resolution, after scaling, is 300 ppi (1200 ppi for bitmapped images).
- Embed and outline all fonts.
- NVS's rich black build is C:40 M:30 Y:0 K:100
- Exclude security settings.
- Convert SPOT colors to PROCESS.
- Do not crop images. Use clipping masks instead.
- Add 1" bleed for any large scale printing. (See exception for Vehicle wrap projects)
- Build document at final size, or at a proportionate scale. For large print sizes, the preferred scale is 1/2, 1/4 or 1/10
- All elements that require die-cutting or CNC need to be provided to us on a path.

Specialty Ink Printing

If your project is printed with the use of Spot White or Spot clear/matte varnish please make sure that the desired special effects layer is a specified path.

1. If the star should be printed with white ink or gloss overcoat

2. Provide the special ink layer, highlighted as a separate path.

Die Cut Vinyl / Contour Cut Graphics

If your project requires die cut lettering / logos / graphics. Please follow the following:

- Outline all text
- If the project requires printed and cut raster graphics, please provide the cut path on a separate layer.

Vehicle Wraps Projects

We can assist your designer in creating your files for print-ready submission. In order for us to provide you with a template, let us know the Make/Year/Model of your vehicle. In addition if you have photos of the vehicle, please forward them to us as well. When working on the correct template, please remember to follow all of the standard submission guidelines, and in addition make sure that the below is implemented:

- Preferred scale is 1/2, 1/4 or 1/10
- Please do not crop images, and provide at least 10" of bleed outside of the vehicle outline
- When designing take note of the vehicle's emblems. If you would like for us to remove them, note it in your file submission. If the would stay - design around them.
